

**Carrie Shores** is an architect who is improving people's lives through design focused within the aging population. By challenging the function and ease of everyday life, she makes our environment more accessible and adaptable, with or without disability. Her service coined ASAP (Architectural Solutions for the Aging Population) is designed to specifically address the lack of inspired housing available to seniors forecasted over the next 50 years. As Certified Age-In-Place specialist, her end goal is to create a barrier-free environment for her clients allowing them to live as independently and effortlessly as possible.

Carrie is a principal at Larson Shores Architects in the Bay Area. She has a Masters in Architecture from UC Berkeley. Carrie is both a Certified Age In Place Specialist and a LEED Accredited Professional.
